Objective

Results-driven Software Engineer with 5+ years of hands-on experience in backend and full-stack web development, specializing in .NET Core, C#, and Blazor. Skilled in developing scalable client- and server-side applications, designing secure RESTful APIs, and optimizing code for performance and reliability. Adept at testing, debugging, and ensuring code quality while gathering and refining technical specifications and requirements to meet business needs. Proven success in leading and contributing to enterprise-grade projects, including on-premise POS systems with advanced business features. Proficient in Agile methodologies, relational databases, and writing clean, maintainable, and well-documented code. Committed to delivering high-performance, secure, and efficient software solutions aligned with organizational goals.

Experience

Horizon Group (شركة الأفق لتقنية المعلومات)

Full Stack Blazor & .NET Core Developer (Onsite)
Outsourced from Horizon.sa

Jan 2024 – Present
Riyad, Saudi Arabia

- Skilled in .NET Framework, C#, ASP.NET Core, and Blazor, with strong knowledge of POS systems.
- Designed and built RESTful services to allow seamless integration between the data collection system and other components of the energy efficiency platform

ITLINK (اي تي لينك)

Backend .Net Developer (Onsite)

Jan 2022 – Jan 2024
Cairo, Egypt

- Designed and developed a full-featured parking reservation application with a .NET Core backend, implementing RESTful APIs to handle user reservations and manage parking availability.

Technical Skills

Programming/Web: C# | Asp.Net | Asp.Net Core | Asp.Net API | Asp.Net MVC | Dependency Injection | Blazor | SQL Server | SQL | Entity Framework Core | Github | SignalR | Linq | Docker | Debugging and Troubleshooting | Problem Solving | HTML CSS | bootstrap | Javascript | JQuery | AJAX

Soft Skills

Team Work: Influencing, Decision-making, Listening, Reliability

Time Management: Resource management, Prioritizing, Delegation

Interpersonal: Adaptability, Patience, Creativity, Responsibility

Educations

Faculty of Computers and Artificial Intelligence
Computer Science Bachelor's Degree

2017 – 2021
Minia University

Languages

- **Arabic:** Native
- **English:** Conversational

Projects

Saudi Center for Energy Efficiency

Developed secure .NET Core RESTful APIs for an energy efficiency platform, enabling data collection, processing, and analysis from multiple sources. Implemented JWT-based authentication and authorization to protect resources and ensure controlled access.

General Authority for Real Estate (REGA)

Contributed to the General Authority for Real Estate's mobile application by developing APIs to support key features and ensure seamless backend communication. Designed and integrated SQL Server databases to efficiently manage news, categories, and user data.

Vision Integration Project

Developed a robust backend API using .NET Core to integrate with vision processing systems, enabling seamless communication between frontend and backend components. Designed and implemented RESTful endpoints for efficient data retrieval and manipulation, while incorporating security best practices and performance optimizations to reliably support high-traffic workloads.

Parking Reservation System

Developed a comprehensive parking reservation application with a .NET Core backend, implementing RESTful APIs to manage user reservations, availability checks, and payment processing. Built an intuitive frontend interface to improve the booking experience and integrated real-time notifications to deliver instant confirmations and reminders.
